TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

January 21, 2005, Revised April 14, 2005

Mr. Ted Tiberi, President
ARID TECHNOLOGIES, INC.
130 N. LaGrange Road
LaGrange, Illinois 60525

Dear Mr. Tiberi:

The Texas Commission on Environmental Quality (TCEQ) has reviewed your submissions (including your third party independent review by Technology Resources International, Inc. of California Air Resources Board test data) requesting Texas approval in accordance with 30 Texas Administrative Code 115.243 for ARID Technologies PERMEATOR AT-150 membrane processor as an add on device to gasoline vapor recovery systems to reduce and recover excessive emissions and to be classified as Texas ORVR Compatible.

In accordance with 30 TAC 115.243; TCEQ hereby approves ARID Technologies PERMEATOR AT-150 membrane processor for installation on gasoline dispensing facilities in the State of Texas and is considered ORVR Compatible in Texas as of April 13, 2005 when installed and operated in accordance with the manufacturer's recommendations. This approval for use in Texas is not subject to any constraints or restrictions imposed by other state environmental agencies within their respective jurisdictions. In areas of Texas requiring Stage II, ARID Technologies PERMEATOR AT-150 membrane processor may be installed in addition to any approved non-burner Stage II system thereby making that entire system Texas ORVR Compatible when operated in accordance with appropriate original Stage II system CARB Executive Orders and manufacturer's recommendations. At the owner's discretion, in facilities requiring only Stage I, ARID Technologies PERMEATOR AT-150 membrane processor may be installed in conjunction with any approved Stage I system.

If I may be of any further assistance please call me at 512 239 2620.

Yours truly,

A handwritten signature in cursive script that reads "Roger S. Vaughan".
